

# Poppy

Poppy aged 8 loves being outside, doing gymnastics, reading and watching films. A happy child who vocalises her wishes, feelings and what she likes.

## Poppy was neglected in her early years and uses food as a comfort

She is currently overweight and is being encouraged to be more active and enjoy a healthy balanced diet. Sometimes she is teased at school because of her weight.

Poppy enjoys hugs and chats with her carers and requires support to develop an

understanding that material items do not indicate care and love.

We would like Poppy to be placed with long term carers where there are no children under 5 years old, and with carers who can develop routines, boundaries and nurture her until adulthood.
