

Tania

Tania, aged 9 is a very tall girl of dual heritage who likes school, being active and playing with Lego.

Very chatty and well mannered she likes routines and boundaries but she can be sensitive when challenged and can find it difficult to accept praise.

Tania has dealt very well with the significant instability she has had in her life up until she came into care, and has the resilience and ability to adapt to new situations.

Although she loves school she is not meeting expectations although her reading is improving greatly and she loves trying out new experiences.

We are keen for Tania to remain at her current school, maintain contact with her mum and grandfather but to have a long term foster placement with an active family who live on the outskirts of the Telford area.

If you think you can offer a long term home to Tania and support her - please get in touch on **01952 387387**
