

Connor

Connor aged 8 is an active boy who enjoys going to Cubs and swimming lessons. He also likes Star Wars and playing with Lego.

Connor is a caring and inquisitive child, with a cheeky smile and a fun personality. He is well behaved and at school he works hard and is popular with the other children.

He has a natural aptitude towards more practical things, evidenced by his love of building things and exploring nature.

Connor would benefit from living with a nurturing family with no more than one other child at home. Ideally his foster carers would continue to take Connor to the clubs he attends and be able to transport him to and from school in Newport. They would need to be active and energetic and be able to implement clear and consistent boundaries within a secure and loving home environment.
