

Sara

Sara aged 8 loves art and crafts projects and superheroes, especially Spiderman! She is a playful and fun loving child with an assertive and endearing personality.

Sara is always on the go and, although she uses a wheelchair, she has boundless energy. She is very small for her age but, in spite of this she is quick to make her presence known and is very strong minded and determined.

Sara was born with a number of medical conditions. This means she has complex health needs that require 24 hour support to ensure she remains healthy and safe.

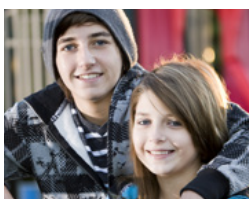

She would benefit from being with a family who are

committed to understanding her medical needs and are willing to undertake extensive training with health professionals in order to meet these needs.

Despite this Sara is first and foremost a fun-loving 8 year old, who needs positive role models and an energetic family who enjoy doing fun activities. Like any child she needs clear, consistent boundaries and routines and would benefit from living with carers who can devote time to her education and to building a positive attachment with her.
